VERTICAL POETRY

In my mind's eye I can still see that distant land where the mountains stood on tiptoe, lightly brushing the sky, while, wearing a long cloak, Mother Nature paraded amongst woods and streams, leaving behind her a trail of petals, a maze of streams, snow diamonds and ice forests.

Yes, that's what I can remember... bright buds and scree studded with chamois, but also brave rangers and the nostalgic song of miners. I shall never, ever fail to remember that land which has stayed with me, and along with it the genuine poetry of the peaks and rocky fingers that caress the world's limbs.

UNDYING NOSTALGIA

A place exists in the Aosta Valley that stays in the heart of all those who set foot there. It's a place you visit with naive awareness, then return for a physical necessity, as if in response to a vital need.

The Irish would compare it to the nostalgia felt after visiting the land of fairies - such a heart-wrenching languor that it takes your breath away. This is exactly how you'll feel after leaving the Cogne Valley; in your mind's eye remain its verdant expanses of larch and spruce trees, the gentle slopes dotted with white lilies where chamois and marmots bound in the shade of rock cathedrals, and fox

creep stealthily across snowy glades under the stern gaze of ibex intent on guarding the mountains.

Mountains that resemble a crowd of grey giants jostling for height, overlooked by Gran Paradiso and its dizzying 4,000 metres – a white Titan whose slopes are woven with footpaths and mule tracks. The very ones used by the great Kings of Italy in past centuries, paths of untamed beauty that lead to roaring waterfalls, and boundless blooming meadows, cutting through quaint villages that overlook infinity and sparkling ski runs which are perfect for snowshoeing or skiing.

It's a delightful valley that appears to spring from a romantic water painting, so immersed in nature and respectful of the environment it deserves the title "Pearl of the Alps".

It's a valley that echoes with voices of the past, old tunnels hewn out of the rock, folk dancing to the rhythm of drums and jingles, colourful costumes parading in a swirl of lace at village festivals.

It's a land of delicious recipes and secular traditions; at its dewy feet stretch lush orchards and abundant vines whose succulent grapes

admiringly watch imposing Roman and medieval ruins: colossal aqueducts and fairytale castles.

This and much more awaits you in the Cogne Valley, but beware, once you've been there, a lifetime spell will be cast upon you ensuring your return.

*Bonjour,
I'm Martin,
your guide!*

Welcome stranger! What a pleasure to meet you! Just a moment, let me get closer... I can hardly hear because of the racket the picks are making.

Well, yes, you guessed right, I'm Martin, a miner!

Perhaps you didn't know but here in Cogne there used to be a thriving mining

industry with underground tunnels, wagons and material ropeways, and miners used to dig to the depths of the mountains to bring magnetite to the surface.

Do you want to hear some anecdotes? Then let me guide you around this land of legendary beauty, where past and present mingle, giving life to such a precious union no jewel can compare to it...

In addition to iron, also copper and silver have been extracted from Cogne mines - the highest in Europe - since the dawn of time, even by the Salassi peoples and the Romans. This historical and cultural heritage of inordinate importance has been salvaged thanks to the creation of museums and guided tours into the bowels of Mount Creya.

GRAN PARADISO NATIONAL PARK

SUPREME BEAUTY OF THE ALPS

Get ready to admire soft grassy expanses studded with white lilies, which intertwine gurgling streams and woods with towering, tousled tree canopies.

Prepare to be left speechless before the crystal-clear water of lakes that reflect a limpid sky traversed by soaring eagles, or to listen to the infinite chanting of nature spread over 70,000 hectares of pure wonder.

Here chamois nimbly scale sheer rock faces, marmot hide amongst tufts of grass and solemn ibex graze in silent, rugged pastures...

MARCIAGRANPARADISO

IF SPORT BECOMES HISTORY

It was in 1910 when the people of Cogne discovered a new, rather bizarre means of transport: pieces of wood bound to shoes by strips of leather and used to slide on snow.

Sixty-five years passed before those rudimentary skis gave rise to one of Italy's most important long distance cross-country races: the Marcialonghino. In the meantime, this new sport had become popular, and one of the Aosta Valley's first ski clubs had been formed. The 40-kilometre Marcialonghino competition takes place once a year at the foot of Gran Paradiso range and hosts many famous top international skiers.

MINES AND MINING PARK

COGNE'S HEART OF IRON

Welcome to Europe's highest magnetite mine. Here, amongst gloomy ancient tunnels and creaking trains, you can visit an underground world where the sounds still echo of labouring miners, pick-axes chipping at the rock and rail wagons rattling by.

It's an extraordinary journey taking you to the bowels of Mount Creya, in one of the Aosta Valley's most fascinating mining parks, with over 100 kilometres of tunnels in which you can see for yourself the work of brave miners whose fate has been left etched in the rock. Aosta Valley Mining Park and Cogne mines Exhibition Centre has recently opened to the public.

AYMAVILLES CASTLE

A FORTRESS ON THE HILLSIDE

You cannot fail to be charmed by this graceful castle that overlooks Aymavilles with four imposing crenellated towers - an everlasting memory of the Challant family.

It has taken decades to restore it to its former glory: today an interesting display itinerary recounts the history of the castle's noble owners and its distinctive, prestigious architectural features, which are partly medieval, partly eighteenth century. It additionally houses wooden sculptures, jewellery, painted canvases and numerous other treasures that form part of the valuable Académie Saint-Anselme collection.

LES DENTELLIÈRES

LACEWORK

Once upon a time, in 1665, a small group of Benedictine nuns fled from Cluny to find refuge in neighbouring Aosta Valley. With them they conveyed a tradition that would soon become the symbol of Cogne: bobbin lacework.

This art requires patience, memory and precision. Considering that the techniques are handed down orally with no drawings or written instructions, it is a true miracle that the craft has survived to today. The co-operative Les Dentellières has perfected this tradition, and it is possible to admire their elegant items of hand weaving in a permanent exhibition at Maison di Pitz.

Despite Cogne's strong tie to the past, it has always been a forerunner and the birthplace of eclectic figures who have known how to restore, foresee and innovate.
